Sample Fire Guard Test Questions and Answers

Preparing with sample questions can significantly improve your chances of passing the actual test. Below are common questions along with detailed answers.

Question 1: What is the primary purpose of a fire extinguisher?

Answer:

The primary purpose of a fire extinguisher is to suppress or extinguish small fires before they escalate into larger, uncontrollable blazes. Extinguishers are designed for specific types of fires based on the materials involved, such as electrical, combustible liquids, or ordinary combustibles. Proper use of a fire extinguisher involves the PASS technique: Pull the pin, Aim at the base of the fire, Squeeze the handle, and Sweep from side to side.

Question 2: Which type of fire extinguisher should be used on electrical fires?

Answer:

A CO2 (carbon dioxide) or dry powder extinguisher is suitable for electrical fires. These extinguishers do not conduct electricity and are safe to use on live electrical equipment. Water-based extinguishers should never be used on electrical fires, as they increase the risk of electrocution.

Question 3: Name three common fire hazards found in workplaces.

Answer:

- Faulty electrical wiring or overloaded sockets
- Improper storage of flammable materials
- Ignition sources such as open flames or heat-generating equipment

Question 4: What steps should you take when you discover a fire?

Answer:

- Sound the alarm or alert others
- Call the emergency services immediately
- If trained and it is safe, attempt to extinguish the fire using the appropriate extinguisher
- Evacuate the area following established procedures
- Assist others, especially those with mobility issues
- Do not attempt to fight large fires; focus on evacuation and alerting professionals

Question 5: How often should fire safety equipment, including extinguishers, be inspected?

Answer:

Fire safety equipment should be inspected regularly, typically monthly, to ensure they are in proper working condition. Additionally, annual professional maintenance and thorough servicing are recommended to verify functionality and compliance with safety standards.
